GIANT DIRIGIBLE MEETS DISASTER

R-101 On Way to India Crashes in
France and 47 Lives Lost
When it Burns

Beauvais, France, Oct. 6.—Forty-six Britons, including men famous in British public life, met a dreadful death Sunday when the R-101, largest dirigible in the world, enroute to India, crashed to earth and exploded in a wooded valley near Beauvais. Only eight persons, all members of the crew, survived the disaster. Rigor S. Church lies in hospital so seriously burned his life is despaired of.

Shaken by no other event in recent years, the British nation mourns the loss of its once proud mistress of the air, the giant dirigible which Saturday night sailed across murky skies to an appointment with death.

Flight to India

The R-101, which burned crude oil, was engaged in a great flight to India and back again. The giant ship's first stop was scheduled to be Ismailia, distant about 2,800 miles from London. From Ismailia to Karachi, terminal point of airships on the outward trip is 2,530 miles. Karachi was expected to be reached in 4 or 5 days.

Gale Was Blowing

The disaster occurred at 2.40 a.m. (9.30 p.m., Eastern Standard Time, Saturday) as a gale was blowing in from the Channel.

The big airship, cruising at an altitude of 400 feet on her way south to Bordeaux, crashed into a farmer's field near the village of Alonne.

By the time farmers, roused by the sound, had reached the field, the pride of Britain's dirigibles was a mass of fiercely burning flames.

The authorities of the Beauvais prefecture were notified by telephone and rushed with the police and first aid kit to the field. They were too late to save more than seven of all the brave and distinguished men who set out cheerfully for the East Saturday afternoon.

Blamed the Storm

French air ministry officials ascribed the disaster to high winds. They said the R-101 hurtled downward into the field, burst into flames and exploded.

Since early evening the wind had been rising over the French channel coast, heralding a storm out in the Atlantic. It struck heavily soon after mid-night.

At first the fact that smoking was permitted aboard was considered as a possible cause of the explosion, but the official version of the police blamed it upon the wind.

In addition to Lord Thomson, many of Britain's foremost aircraft authorities were aboard the R-101. They included Sir Sefton Brancker, director of civil aviation; Major G. H. N. Scott, commander of the R-34, and Wing Commander R. B. Colmore, director of airship development.

AIRPLANE CRASHES AT GLEICHEN ON SATURDAY

A pilot and a passenger were killed at Gleichen on Saturday afternoon during an exhibition flight. The plane stalled in mid-air and came to earth with a crash. The plane was destroyed by fire and the occupants burned beyond recognition. This is the second accident of its kind near Calgary within a few days.

FUNERAL HELD OF COL. WEAVER

Thousands of residents of this city and district attended the funeral of Col. C. Y. Weaver, Saturday afternoon from All Saints, Pro-Cathedral to the soldier's plot, Edmonton cemetery.

A large representation from Calgary, members of the Headquarters Staff and of the Calgary branch of the 49th Battalion association were among those in the cathedral.

High military, civic and government officials, as well as church dignitaries were there in large numbers.

Capt. Rev. G. G. Reynolds, rector of Holy Trinity Church, who fought as a company commander in the Princess Patricia's Canadian Light Infantry, and came in contact with Col. Weaver "up the line" on many occasions, conducted the services.

The military was out in force, with many of the "old brigade" paying their last respects to the departed.

WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market Examiner, of Calgary, For This Paper.

BEEF—Reports from Edmonton indicate that the market there during the past week has not been quite so active although the bulk of the offerings are turning over without difficulty. Choice heavy steers sold at \$5.25@\$5.50; choice light \$5.25@\$5.75; good from \$5.00@\$5.25; medium \$4.25@\$4.75; common \$3.50@\$4.00. Choice heifers made from \$5.50@\$5.75; good kinds at \$5.25@\$5.50.

FEEDERS, STOCKERS—Demand continues active and prices are holding firm. Feeder steers sold at \$4.75@\$5.75; stock steers \$3.50@\$4.50; stock heifers \$3.50@\$4.50, and stock cows \$2.50@\$3.75.

HOGS—Edmonton reports no change in hog quotations. Bacon at \$11, selects \$11.50, and butchers at \$10.65, fed and watered basis.

SHEEP—Edmonton reports a better tone to sheep market, with prices slightly firmer. Yearlings \$4@\$5; ewes \$2@\$4 and lambs \$5@\$7.

CREAM—Receipts continue to show a decrease, but volume holding up very satisfactorily. Prices unchanged after last week's advance. Special quoted at 27@29¢; first, 25@27¢, and second, 22@24¢.

POULTRY—Prices steady: No. 1 fowl, over 4 lbs., 10¢; No. 1, under 4 lbs., 8¢; No. 2 5¢; roosters, 5¢; pullets, 12@14¢.

EGGS—Jump of 3¢ registered in prices on Monday this week. Extras now quoted at 26¢; firsts, 24¢; seconds, 20¢. Receipts continue light. Quality only fair. Modeately active demand prevails.

HIDES—No improvement noted in this market. Tanners only making limited purchases. Receipts light, for owners not desiring of selling at prevailing quotations. Prices unchanged.

WOOL—No change in this market. Jobbers quoting 7@8¢ lb., and reporters not handling any. Bulk of clip marketed.

PROGRESS JUDGES VISIT INNISFREE

Dr. R. C. Wallace and Party Witness Ukrainian Dances.

Innisfree.—The judges in the progress competition of the Canadian National Railways, along with a party of C.N.R. officials visited many communities near here Thursday.

Dr. R. G. Wallace of the university of Alberta with Mrs. R. B. Gunn of Lloydminster and Dr. W. H. Fairfield, superintendent of the experimental farm at Lethbridge acted as judges.

The party inspected farm homes and products at Ranfurly in the morning. At noon they were given a luncheon in Innisfree by the business men.

Dr. Wallace, Mrs. Gunn, and Mr. Craig, deputy minister of agriculture, gave brief speeches outlining the purposes of the contest.

Mr. M. C. Anderson and R. B. Hall outlined the history and progress of the local community.

Following the luncheon, the party were driven through the new Canadian districts, Marislow, the first visited, had a most wonderful exhibit of aircraft by the women. The young people of Lesznow and Marislow gave an exhibition of Ukrainian folk songs and dances.

The party went to the Hillock school, inspecting it and the many farm homes on the way.

UNITED CHURCH NOTES

The services next Sunday will be at Strawberry Plains, Roseberry and town. The topic of the sermon will be "The Parable of the Potter."

The Ladies' Aid are holding a tea and shower on Saturday, October 11, during the afternoon and evening at the Manse. The ladies of the congregation and friends are invited and asked to bring some article or piece of fancy work for the forthcoming Bazaar.

ST THERESA CATHOLIC CHURCH IRMA, ALBERTA

Service on the first Sunday of each month at 11 a.m.

ANNUAL MEETING MOTHER CHURCH

Christian Scientists From Many Countries Gather for Meeting in Boston, Mass.

Assurances of richer fruition in the understanding and application of practical, operative Christian Science, resulting in widespread healing, a. continuing growth, of. branch churches and societies, and the establishing of more efficacious facilities for benefiting humanity, were gratefully voiced at the Annual Meeting of The Mother Church, The First Church of Christ, Scientist, in Boston, held in the church edifice.

Progressive steps in activities already ready underway, and provision of new equipment enabling the departments of The Mother Church to give broader scope to their work, were reported in the reports of officers.

Science, treatment, cures, cures and renewed consecration to the teachings of Mary Baker Eddy, the Discoverer and Founder of Christian Science.

Overflowing the main auditorium into the original church, where amplifiers had been provided to bring the speaker's voices to those who did not obtain seats in the extension, approximately 6,000 Christian Scientists from all over the world attended the meeting, and has been given in the reports to which you have listened.

Stated in Part:

The Directors are gratified at the substantial progress which has registered itself in the field of Christian Science during the church year just closed, and which has been given in the reports to which you have listened.

We are particularly impressed by the substantial numbers of those who are consecrating their lives to the healing work which our beloved Leader expected Christian Scientists to do, but however satisfied one may be with the evidences of progress on every hand, it is essential that we make every effort to do those things which tend to spiritualize our endeavors.

The experiences of the past year have helped us to understand our Leader better and to revere and love her more. She is still teaching us through her inspired writings to love God with whole-hearted devotion, and so doing we shall realize more fully with each passing year the fulfillment of the words of the eleventh chapter of Revelation, "The kingdoms of this world are become the kingdoms of our Lord, and of his Christ; and he shall reign for ever and ever." (15th verse.)—The Christian Science Monitor.

The world's Baseball series is attracting considerable interest among baseball fans. Philadelphia won the first two, St. Louis the next two, and Philadelphia the fifth. If Philadelphia wins today the series are over, otherwise the seventh game will have to be played.

FLASH—Philadelphia won sixth game by score of 7 to 1 today, thereby winning the world's championship for the second time in succession.

The Saturday evening dances are again being run every Saturday evening from 9 to 12 in Kiefer's Hall, Irma. Admission: Gents 55¢, Ladies free.

Household Hints

Following are the directions for preparing some of the most popular stain removers:

Javelle Water—Dissolve 1-2 pound chloride of lime in 2 quarts of cold water. Dissolve 1 pound of washing soda in 1 quart of boiling water, using an earthenware dish. Pour the clean liquid from the Chloride of lime into a bottle and mix the solution of washing soda. Cork and keep in a dark place.

Oxalic Acid (poison)—Dissolve one ounce of oxalic acid crystals in 3-4 oz. of cup of warm water.

Potassium Permanganate—Dissolve one teaspoon potassium permanganate crystals in one pint of water.

Hydrogen Peroxide—Add a few drops of ammonia just before using to make its action quicker.

Some of the most common stains may be removed as follows:

Blood and Meat Juice—Soak in warm water and wash. A paste of raw starch mixed with cold water can be applied to stains on flannels, blankets and heavy goods. Allow to dry and brush off. Repeat if necessary.

Bluing—Boil the stained material in clear water for 20 minutes.

Egg—Wash in cold water, then warm water and soap.

Chocolate, Cocoa and Coffee—If cream has been used, first apply a grease solvent then pour on boiling water. Bleach if necessary, with potassium permanganate or Javelle water.

Fruit and Fruit Juices—Use boiling water poured from height onto the material, which has been stretched over a pall or bowl. Apply bleach if necessary, rinsing thoroughly.

Grass—Use grain or wood alcohol or ether, applied by spraying. Wash with cold water and soap; bleach if necessary.

Grease and Oils—Rub wash goods well with lard and wash in warm water. Lay delicate fabrics liable to be injured by water on a soft pad and apply soaps such as carbon tetrachloride or solvents such as carbon tetrachloride.

Indelible Pencil—Soak stain in alcohol and wash with water and soap. Apply potassium permanganate if a bleach is needed.

Ink—For most writing inks, soak the fresh stains in sour milk or buttermilk. Fresh ink on carpets can often be removed by covering repeatedly with layers of table salt. Salt and lemon juice will bleach white garments hung in the sunshine. On woolen garments apply equal parts of ammonia and hydrogen peroxide.

Tobacco—Soak and water, followed by lemon juice. Use Javelle water on white cottons and linens. Sponge wool with alcohol.

VIKING

Mrs. H. M. Hilliker and Mrs. M. H. Slop were delegates at the Annual Convention of the Alberta Provincial Woman's Christian Temperance Union, which was held in Red Deer, October 1-2-3.

They report a very fine Convention with good interest and very fine reports from the different Departments worked by the organization throughout the Province.

On Wednesday evening a very fine banquet was held, at which greetings were extended to the delegates by representatives of the local churches and affiliated bodies, and the local press.

His Worship Mayor Snell welcomed the delegates officially on behalf of the City and paid a fine tribute to the work of the W.C.T.U.

The outstanding feature of the Convention was the splendid address given by the president Mrs. L. C. McKinney, Claresholm. It was a helpful, inspiring message, pleading for more faithful effort in the future.

The Convention will meet in Edmonton next year.

The annual United Church dinner will be held in the Church Hall on Saturday, October 18th. Keep this date in mind.

YOUR PRINTING NEEDS

The News printing office is now in a better position than ever to attend to your printing requirements. A good quality of stock used on all jobs, and the printing is as good as you can get anywhere. We meet city prices, and in many cases are considerably lower, stock and workmanship considered. May we fill your next order?

Irma Talkies

Methods used by expert criminals in modern machine gun tactics against banks are exposed in George Bancroft's newest all-talking paramount picture, "The Mighty," which presents Bancroft as the military commissioner of public safety in a crime ridden city.

The story is one of the most dramatically powerful that Bancroft has ever been given, being written by the same author who wrote "Underworld," one of Bancroft's earliest successes.

Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in grain is being produced on the prairie Canadian prairie provinces is less would lead one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is an axiom that nowhere can hogs be produced more cheaply than at the fountain head of the grain supplies. Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dairy by-products, turns out nearly twice as many hogs for every ton that comes from the West.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-sustaining farming demands the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable. Today, though the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of cattle, sheep, and swine on farms is an important percentage of the whole in the Dominion. The fact has great value economically, for it tends to spread agricultural wealth more evenly over the seasons than is possible with grain growing only.

The four western provinces have now more than three times as many cattle, more than four times as many sheep and nearly eight times as many swine as there were in the corresponding range day. Comparative figures for the year 1901, when complete records were first gathered, and 1929, are as follows:

Year	Cattle	Sheep	Swine
1901	1,066,627	215,998	241,794
1929	3,554,040	1,114,143	1,728,908

It is interesting to examine the figures of the western livestock production of Western Canada for the last eight years. In arriving at the total it is difficult to gauge the number of head of livestock slaughtered on farms for human use and by local butchers and at small unincorporated killing plants. The Dominion Bureau of Statistics finds that in the case of cattle inspected, slayings run about fifty per cent. of the yearly estimated total kill in Canada, about forty per cent., and sheep about forty per cent. By making the necessary adjustments, therefore, on the inspected slayings in the Western provinces a fairly close estimate of the local of uninspected killings may be made.

Total figures representing some seven and one-third million cattle, over eighteen million hogs and about two and three-quarter million sheep look to the credit of Western Canada at first glance. When it is found by further figuring that for the same period 15,398,097 cattle, 47,481,905 hogs and 10,905,429 sheep and lambs are the estimated total killings in the whole Dominion of Canada, a slightly different aspect of the picture is presented. Continuing with the comparison it is seen that Western Canada produced roughly 48 per cent. of the total cattle, 38 per cent. of the swine and about 20 per cent. of the sheep and lambs.

Is this a fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total? If only livestock production is considered in terms of acres of land under cultivation and suitable for cattle production one might form the opinion that the West should be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of bushels of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fair share.

Swine production figures, however, are not so easily disposed of in that manner. The fact that so much

North America is, next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the declines in the United States and Mexico. Ten years ago the gold output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On the Increase

Reports from some leading sheep producing countries is that a reduction in the flock is taking place. The Bureau of Agricultural Economics in the United States believes the decrease will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "staying in." Our total sheep number is insignificant compared with the estimated total of about 700 million for the whole world. Still more to the point, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are for a steadily growing demand for good quality Canadian lambs for a long period.

In the United States the unwisdom of going out of sheep too strongly is hinted at by the Bureau when it is advised: "The individual producer is advised to consider carefully his feed supplies and the long-time outlook for the sheep industry, in making his plans for next year. Where feed supplies are available he may find that present conditions offer a good opportunity for improving the quality of his breeding flock."

Predicts Growth Of Dairying

Manitoba Dairy Commissioner Notes Steady Increase Of Industry In The West

L. A. Gibson, dairy commissioner for Manitoba, states that he never saw a better show of butter than that exhibited by Manitoba at the Toronto Exhibition. He noted a steady growth of interest in the dairy industry of the West, and pointed out that in Manitoba alone the sale of butter, cheese, cream, milk and other dairy products amounted now to \$15,000,000 a year. He believed that the next few years would witness an even greater growth in dairy production.

World's Grain Show

Many Countries Have Signed Their Intention Of Being Represented

Balgum has officially accepted the invitation to take part in the World's Grain Exhibition and Conference at Regina, from July 25th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate and a number of these have already signed their desire to do so. They include Peru, Yugoslavia, Guatemala, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

The first sandwich from an ox roasted before 5,000 people at a recent charity event at Coalpit Heath, England, was sold for \$22.75.

Owned Valuable Coin

After walking around for several months with a \$20 gold piece minted in 1847 in his pocket, Clark Le Bounty of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. You could have knocked him down with a feather when he read that because of the peculiar thickness of the design it was worth \$2,500.

GERMAN BATTLESHIP "HESSON" FIRING A BROADSIDE

Photograph taken during the recent German manoeuvres shows the "Hesson" firing a broadside. The manoeuvres are at Kiel Bight.

Veteran Canadian Explorer Returns To Atlantic With Relics of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands of the mainland of Canada 83 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

Their discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Back's Fish River.

The fragment of a canvas tent, circular in shape, and lending color to the assumption that this portion had been frozen to the ground while those occupying it had torn away the remainder, pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife constitute Major Burwash's find. He encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 80-odd years that have elapsed since the two ships, "Erebus" and "Terror," set out in an attempt to discover the North West Passage, a certain fascination continues to surround the fate of their crews. For 70 years a veil of mystery has shrouded them and only one small scrap of paper has ever been discovered relating to the expedition. This was the report and message found on King William Island by the search expedition of Captain McClintock in 1857. The message, signed by Sir John Franklin, announced how the two ships had wintered at Beechey Island in 1846, and that all was well. But marginal notes on the paper written by another hand at a later date, conveyed the information that Sir John Franklin had died in June 1847. The news gave the strength of the party as 165 and they proclaimed the intention to essay an overland journey from King William Island to the Canadian mainland at Back's Fish River.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Rae of the Hudson's Bay Company, surveying the coastline in that neighborhood, encountered natives who were then using tableware and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen straggling across the ice to the mainland, "dying as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island was, in part, to verify, if possible, the story of an American mining engineer, naefl Jenne, who, many years ago, originated a report concerning the Franklin party which would, if correct, have thrown new light on their fate. This story, in document form, was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely establishes that the Jenne story is without foundation.

With two companions, Pilot Gilbert, of the Western Canada Airways, and Richard Finnie, of the Department of the Interior, Major Burwash flew from Bernard Harbor, northwest of the mouth of the Coppermine River, to Boothia Peninsula — the magnetic pole — and thence to King William Island. Landing in a fresh water lake some distance inland, he prosecuted his search between Victory Point and Lady Jane Franklin Point. Having made his discoveries, he returned by air to Coppermine, thence south to Great Slave Lake, Fort Smith, and Murray, Alberta.

Over 2,000 photographs were taken by Mr. Finnie during the flight. These will be of great value to topographers in correcting many inaccuracies regarding the coastline of the mainland and the islands over which the party flew. Matay Island, for example, near where it is believed one of the Franklin ships sank, is not an island, but an archipelago comprising hundreds of islands. Other discrepancies were noted.

Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the goose, providing those two great essentials to successful geese raising — free range and an abundance of green food. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

Finds Five Daughters Expensive

Pleading guilty before the city magistrate of Mysore, India, to the theft of jewels from the Prasanna Krishnaswamy Temple, the high priest testified that his salary was only \$7.85 a month. He added that he had been "cursed" with five daughters, and as their husbands were not able to keep them, he was compelled to maintain their families as well as his own.

Somebody has been asking, "What becomes of pins and needles?" The answer is that they disappear after a brisk rubbing of the affected part.

International Boundary

Important Work In Connection With Demarcation Of 5,500 Miles Of Border

In carrying out its duties of maintaining in a state of effective demarcation the 5,500 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Surveys Bureau of the Department of the Interior, has this year a number of important operations on hand. These include re-opening the vista and repairing the monuments on some fifty miles of the highlands boundary between Quebec and Maine, making surveys for the revision of certain of the boundary maps between British Columbia and the state of Washington, and erecting monuments at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the boundary. It is also intended to locate and mark the boundary of the new Detroit-Windsor tunnel before it is officially open for traffic.

Out Of Luck

The husband came home and was greeted at the front door by his wife. "Did you get the new maid?" he asked.

She shook her head.

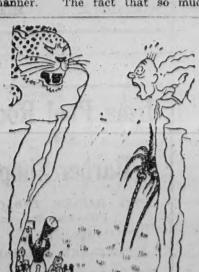

"No, I'm afraid not, dear," she answered.

"Weren't there any at the registry office?" he went on angrily.

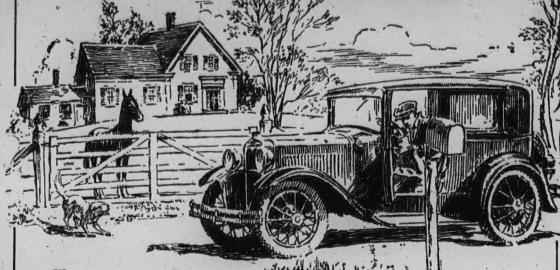

"Yes, darling, but we've had them all before," was the rejoinder.

THE GREATEST OF AIR TRAGEDIES

At least for the people of the British Empire, the wreck of the giant dirigible R-101 and the resultant loss of 47 lives may be said to far and away the greatest of air tragedies to date. So perishes the great airship, sister craft of R-100 which recently visited Canada; so perish too many illustrious men whose names were famous the world over—Sir Sefton Brancker, director of Civil Aviation; Major G. H. N. Scott, commander of the R-34 intrepid explorer that he was and Wing Commander R. B. Colmore, director of airship development, and Lord Thomson, Air Minister.

The tragedy was part of the price paid for a great experiment. From it is unfortunately possible to come to only one conclusion; namely, that the perfection of the lighter than air ship has not yet been achieved. The fact that R-34, R-100 and Graf Zeppelin have all made apparently successful trans-ocean voyages is not conclusive evidence. R-101, so far as anyone new, equally airworthy with her sister ship and admittedly superior to both R-34 and Graf Zeppelin crashed on French soil when she encountered adverse winds.

Whether the failure of lighter than air craft must be admitted is for experts to say but many of them must already have come to the conclusion that the future of air navigation is with the aeroplane.

In spite of our skepticism, man has finally made a complete conquest of the air. He can now fly like a bird, but he still has lots to learn from his feathered friends. It will be a long time, for instance, before he is able to sit comfortably on a barbed wire fence.

It pays to read advertising messages in this paper, week by week, they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—it's advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

VIKING

R. J. Darrah has remodeled his grocery department along the lines of modern groceria and the public is able to get better and quicker service than ever. Other departments are also up-to-date with new goods and the store as a whole is one of the best along the line.

All good things come to those who wait. The annual dinner of the Ladies Auxiliary of the United Church is being held on Saturday, October 18th.

A. Harrington, of Edmonton, was a visitor in this district, a guest of his brother-in-law Mr. A. C. Hamilton, getting in some shooting and otherwise enjoying a good time. Mr. Harrington is proprietor of the Rideau Rooms in Edmonton.

New cement steps and a new storm front at the King Edward Hotel are among the new improvements in buildings noted around town.

Mr. and Mrs. W. H. Wallace motorized to Edmonton on Saturday and were in attendance at the funeral of the late Col. C. Y. Weaver, M.L.A., who died suddenly in the city on Thursday last.

Clyde Hoskins who has been a patient in the Municipal hospital the past few days is reported to be doing well.

Miss Fern Venner arrived from Stettler on Monday and is a guest at the home of Mr. and Mrs. Ken Hillier.

Clyde Scott, formerly employed at the Main Dairy, was up from Hardisty on Saturday where he is now located.

Mrs. N. C. Graham left on Saturday for Edmonton and is a guest at the home of Mr. and Mrs. J. Brydges for a few days.

Mr. and Mrs. A. Oxford, Misses Mabel and Alice, and Mr. Roy Stuckey, of Fort Saskatchewan, were weekend visitors at the home of Mrs. Barker.

Dr. J. M. Hotson, formerly of this place, but now of Vancouver, is in town for a few days renewing friendships and acquaintances.

Mr. and Mrs. O. See, of Edmonton, were guests of Mr. and Mrs. W. E. Henton at the King Edward hotel over the weekend.

The advantages of Ethyl gasoline were demonstrated by a representative here on the main square one day last week which drew quite a crowd.

A light shower Tuesday evening did little to dampen the spirits of some parts of the district for a day or two.

Dr. and Mrs. McGregor, of Edmonton were weekend visitors at the home of Dr. and Mrs. W. G. Saunders.

Miss Ella Brown returned to Edmonton on Monday evening where she will finish a course in stenography.

Adolf Johnson, formerly of this town, motored up from Seattle, Washington, and is a guest at the home of Mike Johnson for a few days.

Jack Swanson has returned from Saskatchewan and is now back in the Viking district.

G. W. Campbell, of Edmonton, is a guest at the home of his daughter, Mrs. J. Goodwin for a few days.

J. Brydges, former accountant at the local bank, is reported to be very ill at his home in Edmonton.

The local horse show club made an unsuccessful attempt on Thursday afternoon at Vermilion to lift the King Edward hotel trophy now held by the Vermilion club. When the final count was made at the finish of the five game series the local squad was about one hundred points shy. A banquet was held after the games at which the boys all had something to say about the great horseshoe game and how they won and lost the cup. The boys were royally entertained and felt that the trip was well worth while even if the cup remained in Vermilion. Those who made the trip were A. A. Long, Wm. Kelly, Jack Kelly, J. L. Slavik, Thos. Hoskins, Angus Ross, R. W. Runyon, Percy Main, Andy McPherson and H. G. Tunell.

The Trail Ranger Camp was reorganized on Tuesday evening in the Church Hall with Mr. Bainbridge as Master. The following officers were elected for the year: President, Milne McLaren; Vice-President, Cecil Runyon; Secretary, Russell Alexander; Treasurer, Douglas Craig; Press Reporter, Victor Bjorkman.

It was decided to hold the meetings on Tuesday evenings at 7 p.m. sharp, and to collect dues of 5¢ weekly. Initiation of New Members will be held on Tuesday, October 21st. Next Tuesday we are to decide on our yell, and the name of the camp.

Each week's program will include Devotional Period, Business, Practical Work, and Games, and the special features throughout the year will be in Hikes, Treasure Hunts, Paper Chases, Hockey, First Aid, Public Speaking, Craft, Group Singing, and all kinds of Badge Work. All boys of 12, 13 and 14 years of age may join. Be at the meeting next Tuesday.

The Wastebasket

Something that you didn't know—
The Cow contains no word of more
than six syllables.

"Tommy, can you tell me one of the
uses of cowhide?"

"Er, yessir. It keeps the cow together."

Asked to pray for warm weather so
that her grandmother's rheumatism
might pass away, a six-year old girl
knelt and said:

"Oh, Lord, please make it hot for
grandma."

Expensive Folly
Mrs. Goldberg and Mrs. Silverstein
were gossiping over the back fence.

"I heard it today that Abe Kaxinsky
was keeping a budget."

"Vot—and his wife too?"

Family Traits
Visitor (speaking of little boy):
"He has his mother's eyes."

Mother: "And his father's mouth."

Child: "And his brother's trousers."

Little Betty was visiting on the
farm. She watched the farm hands
spreading out a stack of hay to dry,
and could no longer contain her curi-

osity, so she politely asked, "Is it
a needle you're looking for?"

Heard at the poker party: "How
do you manage to keep your wife
from getting hold of the letters from
your lady friends?" "I hide them in
her darning basket."

Teacher: "Johnny, if you father
earned forty dollars a week and gave
your mother half, what would she
have?"

Johnny: "Heart failure."

"I wish you'd help me with this
problem, Dad," said a small boy
struggling with his homework.

"Can't, Son," said Dad from
behind his paper: "It wouldn't be right."

"I don't suppose it would," said the
boy, "but you might have tried."

Customer: "That chicken I bought
yesterday had no wishbone."

Dealer: "He was a happy and con-
tent chicken, ma'am, and had nothing
to wish for."

"Who is it that is playing the sax-
ophone so delightfully upstairs?"
asked a young fellow here while call-
ing on a local girl last evening. "Why
we haven't any saxophone," the girl
replied, "that's father snoring up-
stairs."

Heard in the schoolhouse: Prof.
(looking at watch): "As we have only
a few minutes left, I should like to
have any of the students ask me any
question that may be bothering them."

Student: "What time is it, please?"

"I'm sorry these bills are so soiled,"
said the cashier of a bank when cash-
ing a cheque for a school ma'am there
last week. "I hope you are not afraid
of microbes?" "Goodness, no," she
replied, "a microbe couldn't live on
my salary."

Still Going

Silas: "What's that I hear, Hiram,
about your hired man falling off the
roof when he was shingling the barn
last week?"

Hiram: "Yeh. He fell into a barrel
of turpentine."

Silas: "Did it hurt him much?"

Hiram: "Don't know. They ain't
caught him yet."

The teacher had written this brief
criticism on the boy's report card—
"A good worker but talks too
much."

The boy took the card home to be
signed by his father, then returned it.
This is what the teacher found written
on it under her own comment—

"You ought to hear his mother."

FARMERS WANT ALBERTA LIVESTOCK

Many farmers want feeding and breeding cattle. Livestock is one of the best means by which grain can be marketed. Help to preserve this market by keeping unfinished cattle and breeding stock on Alberta farms.

WHAT HAVE YOU FOR SALE?

If you have cattle for sale, send a list giving full particulars of number, breed, age, condition, etc., to —

Livestock Branch—Alberta Dept. of Agriculture
Parliament Buildings, Edmonton

DO YOU WISH TO BUY?

Those wishing to buy cattle should write to the above Branch, giving full particulars of their requirements.

Hon. George Hoadley, H. A. Craig,
Minister of Agriculture Dep. Min. of Agriculture

KINSELLA NEWS

Mr. Claude Wachter of Gibbons spent Sunday at his home here with his mother, Mrs. B. Wachter.

Messrs. Joe and Victor Justik of Killam were callers here on Sunday afternoon.

Mr. Johnnie Beschell and Miss Nida Lue and Mr. McKee and daughter Isabel spent the week end in Edmonton.

Mr. E. C. Williams is having some alterations made to the interior of his house. Mr. L. Ayers of Hardisty has the contract. Mrs. R. S. Nease is

also having some changes made to the interior of his house. Mr. J. Grant of Viking is doing the work.

Mr. G. Chesterman of Edmonton is visiting at Mr. R. Cormack's.

The Brown hoist of the C. N. R. from Edmonton was in here Friday and loaded several cars of gravel.

Mr. and Mrs. Ross McFarland and family of Irma, and Mr. and Mrs. Charles Riley of Silver Lane spent Sunday at R. Eaton's.

Mr. and Mrs. Plummer and family of Overleigh spent Sunday at J. Neale's.

JARROW NEWS

Threshing started on Monday after a delay of nearly ten days from wet weather. We hope the rain and snow will hold off now for a while until the threshing is completed.

Miss Doris Booth, of Edmonton is visiting at the home of Mr. and Mrs. A. McGregor.

Mrs. J. McCracken is visiting in Loughheed this week.

The Girl Guides went on a hike on Saturday covering a distance of about

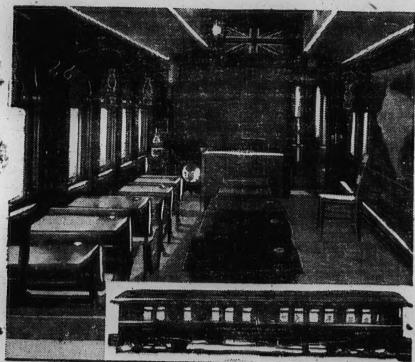

six miles. A very jolly and happy time was spent.

Mrs. Ed. Peet and baby Glenn and Miss Myrtle Peet are visiting in Irma and Wainwright this week.

Mr. and Mrs. H. McDougall visited with their niece, Miss Nan Kennedy at Daysland on Sunday.

Miss Bessie Hart, of Viking spent a couple of weeks in this district visiting with relatives.

EDUCATION ON WHEELS

Under the personal direction of A. McCowan, Assistant General Superintendent of Car Equipment, the Canadian National Railways completed, this week, at the Fort Rouge Shops (Winnipeg) the above car for the use of the Ontario Board of Education.

The purpose of this car is to educate people at points where school facilities are not available. Advantage is taken of this educational equipment by both children and older persons desiring to use the educational advantages, thus brought right to them. Provisions are made for the younger children and commencing to count on the hereafter, up to older children in the regular subjects taught in the best schools, even including typewriting.

The car is also designed to make a permanent home for the teacher. Emerging from the living portion of the car is seen a large Baker heater which is designed to keep the car comfortably warm in the coldest weather; on the opposite side of the car is a large refrigerator 3 ft. 6 in. that will take care of the food requirements for a considerable period. Next will be seen the kitchen with a neat range with hot water connections, standard range, meat and vegetable preparation table, the same metal, under this work table are the usual cupboards, flour bin and cutting board. Two large copper tanks are the means of storing a good supply of water. Over the work table are three cupboards fitted with nests and racks to keep china safe when travelling.

Adjoining the kitchen is a small living room, with removable table, a couch, which can be converted to a bower and upper sleeping berth and a rug, and which

can be used for storing various commodities. The floor of kitchen and living room are covered with batheable linoleum.

A small passage connects with the anteroom, this room is designed to serve the purpose of a dormitory or study. The couch in this room can be pulled out on rollers and made into a full size bed. A呢kネleene wash basin fitted with hot and cold water is in one corner, with the necessary mirror, brush and comb rack.

The room is 27 ft. 3 inches long and contains six large desks and six small ones, with a teacher's desk at one end, on this end behind the teacher's desk is a blackboard and two large maps on rollers.

A large blackboard is fixed on one side of school room with four maps on rollers. At the school room entrance are large book cases containing school text books and medicine books. Drinking water is provided for the use of students in a cooler hung near the door.

Provision is made to keep all the school room supplies and teaching equipment, such as chalk, chalk tray, chalk holder, near the teacher's desk, the floor of school room also being covered with batheable linoleum. A 16 ft. flag pole is carried which is erected when school is in session. School room and kitchen are fitted in mahogany.

This is the second car of this description rebuilt at Fort Rouge car shops, for the use of the Ontario Board of Education on points along the Canadian National Railways.

The danger from human beings can be overcome providing that those who have the disease know it and take the necessary care to prevent the spreading of infection.

The germ of tuberculosis leaves the body in the sputum of the sick person, and it is the dissemination of this germ laden sputum that is responsible for the spread of tuberculosis from one human being to another.

Coughing, sneezing and spitting in a careless manner are responsible for the spread of germs of tuberculosis, because in these actions a spray of droplets is scattered, and so the seed of disease is spread. The case who spends sometime in sanatorium learns there how to live and how to control the cough, or if it is necessary for him to cough, how to collect and destroy the sputum so as not to endanger others.

All adults should protect children by the observance of common decency in refraining from spitting.

All adults should protect children by the observance of common decency in refraining from spitting.

NEWS AND VIEWS
KINSELLA DISTRICT

Miss Mable Falla has accepted a position teaching at the Matigomay school about forty miles north of Manville. Miss Falla left on Saturday and will commence teaching on Monday, October 6th.

A big dance is advertised to take place in the Diamond Willow school on Friday, October 24th. Good music has been engaged and the admission is 50c.

Lou Ayres has arrived in town to do some carpenter work for E. C. Williams. Lou is the son of the old timers of the Jarrow and Kinsella districts, but of late has made his headquarters at Hardisty.

Lou Ayres is busy building an addition to his house out of town.

J. C. Shortill, cattle buyer of Edmonton and H. Cooper of Phillips have shipped several carloads of cattle from Kinsella during the past week. Mr. Shortill has another load or two to be shipped Tuesday.

A very successful dance was held at the Lake Vernon school on Friday evening last. This being the first dance in the school since harvest commenced and drew a huge crowd and a good time was had.

Sigurd Anderson narrowly escaped serious injury while out threshing last week. He was not aware that one of the horses he was using was broken for saddle and after the day's work was over he saddled the horse to go over to a neighbor. Mr. Anderson was thrown out of the saddle but his foot was caught in the stirrup and he was dragged several rods. He was badly shook up and bruised, but received no serious injury, which was very fortunate under the circumstances.

Mr. McKie is spending a few days in Edmonton, also Johnnie Beschell, Miss La Rue and Miss Isabelle McKie.

Threshing is again under way after being held up for several days by wet weather. Very little threshing has been done in the district so far and the farmers are beginning to feel anxious for good dry weather.

TUBERCULOSIS AND CHILDREN

Tuberculosis is a disease which occurs at all ages and which may affect any part of the body. It is one of the communicable diseases and by this we mean that it is caused by a germ called the tuberculosis bacillus which is passed from the sick to the well.

There are two sources of the disease — persons suffering from the tuberculosis and tuberculosis animals. More than one case of tuberculosis frequently occurs in a family, but this does not mean that the disease is hereditary. It usually indicates that the disease has been passed from one member of the family to another.

When a case of tuberculosis is found in a child, a careful inquiry will nearly always reveal another case in the home or amongst relatives or friends with whom the child has been in frequent contact.

Tuberculosis occurs in the lower animals, and cows are very frequently found to be affected with the disease. Tubercle bacilli may gain entrance to the milk as it leaves the cows' udder or by way of dirt off the cow during milking. Children are susceptible to the germ which causes the tuberculosis in the cow. This is known as the bovine type and differs somewhat from the human type.

Children must be protected from infection from these two sources if tuberculosis is to be prevented in childhood.

The danger from milk can be avoided by having the milk pasteurized. Pasteurization of milk supplies is advisable for many good reasons, one of these being that through pasteurization children, who should use milk freely are protected from any danger of contracting tuberculosis from the milk.

The danger from human beings can be overcome providing that those who have the disease know it and take the necessary care to prevent the spreading of infection.

The germ of tuberculosis leaves the body in the sputum of the sick person, and it is the dissemination of this germ laden sputum that is responsible for the spread of tuberculosis from one human being to another.

Coughing, sneezing and spitting in a careless manner are responsible for the spread of germs of tuberculosis, because in these actions a spray of droplets is scattered, and so the seed of disease is spread. The case who spends sometime in sanatorium learns there how to live and how to control the cough, or if it is necessary for him to cough, how to collect and destroy the sputum so as not to endanger others.

All adults should protect children by the observance of common decency in refraining from spitting.

Here and There

(570) While the Canadian Chamber of Commerce is planning to have an office tour of China and Japan leaving Vancouver October 25th, the Empress of Russia, an important group of Japanese manufacturers and merchants is due to arrive at the same port on October 25th, 1930, to visit the Empress of Canada and the United States.

To remove the prejudices of men, women want to be regarded as their partners and to be rewarded on merit regardless of sex, is the view of Miss Helen Cleveland, of Toronto, who is making a mark in an International business bond house and recently elected president of Zonta International at the 10th annual meeting of this world wide women's organization. With forty members of that body she is taking the Alaska trip aboard S.S. Princess Louise.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

INDIGESTION

Banished by Kruschen

"I suffered for many years from indigestion. I used to feel very miserable after meals. The doctor advised me to take Epsom Salts, but it did me no good. I decided to try Kruschen and am now taking it, and do not feel the past few days, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 20 years ago when I first took it."

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric or digestive juices fail to move. What you need is a gentle Nature's own tonic—Nature's six mineral salts.

You get all the six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are stimulated to perform their natural function. Again, in the intestinal tract, certain of these salts promote a further flow of these vital juices which deal with the partially digested food and prepare it fully for absorption into the system.

WORLD HAPPENINGS
BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between that country and Canada, Hon. C. H. Cahan, Secretary of State, sailed recently from New York.

The London Daily Herald reported that King George recently wished to confer a title upon George Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte N. Howell was presented with her entrance certificate.

Crime in Great Britain has deteriorated so much that prisons are operated far below capacity and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association secured the money at five per cent, and will charge members seven per cent, for advances secured by loan notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a war memorial and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

Frederick Edlin Smith, the first Earl of Birkenhead, statesman, 58 years old, died in London, England, Sept. 30, following a lengthy bronchial ailment. He was at one time British Lord High Chancellor and Secretary of State for India. During the war he prosecuted Sir Roger Casement, Irish leader, who was hanged for his wartime activities.

Shipbuilding in Sweden

Sweden Maintains Lead in Industry Among Scandinavian Countries

Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark comes second with 29 ships of 116,000 gross tons and Norway third with 33 ships of 40,000 gross tons. Of the ships at present being built in Sweden nine are steamers or motor ships, 2,000 gross tons each, two motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

Jimmy (watching something tasty going into sickroom)—Please ma, can I have the measles when Willie's done with them?

Shortest Name For Horse
Racer In England Answers To Name
Of "O"

There's a race horse in England named "O." This establishes a practically unassassable record for brevity. One suspects that its owner, Mrs. G. L. Redmond, an American, saw an opportunity to attract a little attention by thus naming the nag, although with so many horses running around these days owners have just about run out of names.

In the United States, there is a rule that a period of 10 years mustapse before a name once used by a race horse can be used again. One in England that these restrictions are that you cannot name your horse after the winner of one of the "classics" nor for a living person without obtaining permission.

The "classics" are five in number, although the term is frequently abused, the Thousand and Two Thousand Guineas, the Derby, Oaks and St. Leger. Horses winning these races retain their individual names in perpetuity.

DELIGHTFUL WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Seasonal delight is wanting some long-sleeved little dresses for the cooler days here is a charming model. If long sleeves are not in demand then this model is equally suitable because the long sleeves may be omitted and Hey Presto! short sleeves.

Very pretty is this dress carried out in a light, flowing fabric, woven in chiffon or some similar thin woolen or wool and cotton. The original in scarlet has yellow and blue blanket stripes (crosses) on the bodice, long sleeves, and cross stitching for wee decorations here and there. Owing to its coloring and trimms, the model assumes a short-sleeved effect.

This pattern may be obtained in sizes 6-12. It is ready for immediate delivery.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Mending clothes is accomplished in the same manner as patching an automobile tire, with a mending paste, which withstands washing, boiling and ironing.

MAJOR L. T. BURWASH

Major L. T. Burwash, noted Canadian explorer, who is back at Ottawa after his epic Arctic flight, during which he mapped the magnetic pole and discovered much to clear up the mystery of the fate of Franklin's expedition.

Use Of Platinum
Suggested For Coinage

But South African Government Finds
Difficulties In The Way

The decline in prices has affected even such rare and costly commodities as diamonds and platinum. The government of South Africa has sought to limit production in the diamond fields and Vaal River so as to stabilize the diamond market, but platinum is produced in such widely separated areas that any centralized control over output appears to be impracticable. As a substitute for regulated production Dr. George F. Kunz proposes in an article appearing in the Mineral Industry that a new demand for platinum be created by the government's using it for coinage.

Platinum money is not wholly an innovation, as Russia experimented with its coinage many years ago. But the interesting thing about this proposal is its resemblance to the demand in this country in the eighties and nineties of the last century for the unlimited coinage of silver for the same purpose — namely, the stabilization of the price of the metal. The scheme in effect would be a new form of bimetallism. The experience of the United States and Europe during the last century proved conclusively that bimetallism is possible only in theory, as any change in the relative value of the two metals which are supposed to circulate concurrently would drive the dearer metal out of circulation.

If platinum coin became worth more as metal than as a piece of money, it would cease to circulate and be used in the arts; if its face value exceeded the value of its metallic content, platinum would ordinarily be used in the arts and would be pushed to the mints instead, and gold would tend to be displaced from circulation.

This would prove disturbing to business in many ways.

The gold standard is far from perfect, but it is the most satisfactory monetary system yet devised. It produces complications enough without the injection of another from the coinage of a new metal. And if our people object to the use of gold coin, they will object still more to platinum, which, for weight, is worth two and a half times as much as gold and is likely also to be confused with silver.

Conduct Mass On Eiffel Tower

A religious mass was said at the top of the great Eiffel Tower recently, the first time since it was built

more than 40 years ago. It took place in the lofty wind-swept little cage

4,000 feet above the earth. A small

music was used as an altar and the

music which accompanied the liturgy

was the breeze. Special tribute was paid to M. Eiffel.

Made It Balance

The wife had been working on the budget plan. At the end of each month she and her husband would add up the accounts together. Every once in a while he would find an item, "L.O.K., \$8."

Finally he said, "My dear, what is this—L.O.K.?"

"Lord Only Knows," she replied.

A chicken jerks its head when running in order that it may see better, scientists of Johns Hopkins University discovered.

A woman's tongue is her sword and she never allows it to rust.

Tea Biscuits unusually good
when made with Magic Baking Powder

If you look at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on every box of Magic Baking Powder. Note that Magic Baking Powder does not contain alum or any harmful ingredients.

3 out of every 4 Canadian housewives who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

Try this Recipe for Biscuits

2 cups flour 2 tablespoons shortening
4 teaspoons Magic Baking 1 cup cold sweet milk, more
1/2 cup sugar 1/2 cup water
1/2 teaspoon salt

Method—Sift together flour, magic baking powder and salt, the water and shortening. Make as thin as can be handled, using a knife to mix.

Flour centre of dough generously, drop dough on it, pat or roll out very lightly to 1/4 thickness. Cut out, bake 15 to 20 minutes in a hot oven.

All biscuits should be cold. Handle as little and as lightly as possible and avoid working in more flour after milk has been added.

This fact was received in a recent Dominion-wide investigation.

Huge New Glacier Found

Ice Field In British Columbia May Be
Largest In World

Bringing back a story of having discovered an ice field that will outlive any previously known, Christian Hauser and Ernest Feuz, Swiss guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden, B.C., by using train, motor, and pack train. With Major Longstaff, of Vancouver, the guides reached the headwaters of the South Gate Littlewood and Toba Rivers, 160 miles north of Vancouver in the Columbia range. The small state of the rivers convinced the experts that the streams were glacial fed and so they penetrated the virgin country at the headwaters.

Huge snow fields and glaciers estimated at an area of 350 square miles were seen and photographed for the first time. Ernest Feuz states that what they saw is only a part of the huge glacial field there.

Try To Decipher Document

Second Andres Balon Coming Ex-
-patriot Still Missing

Experts examining the documents found with the remains of members of the Andres balloon expedition in icy Helvetia are having difficulty with the second of the Andres diaries, which they believe contains the record of the last days of the trio.

It had been exposed during the 33 years since the death of the three men and its contents are well nigh erased by time and the elements.

"If you haven't a doctor," said the tourist at the hamlet inn, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

Another Wonder Of Science

New Device Makes Breath a Kind
Of Third Hand

As we have ceased to wonder at the marvels of science, it is not surprising to learn that inventors have found new uses for the breath of the human body besides just breathing, or blowing on one's hands when cold, or on a cup of tea when hot—assuming one is not taking tea when "E. P. Free" is present.

Dr. E. E. Free, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all that has to do is to blow into a sort of telephone mouthpiece, and it will do a job of work. It makes the breath a kind of third hand when a person is busy.

For instance, if you are playing the piano simply blow into the mouthpiece and it will play a range of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back. Blow again and it will open the door of your auto, or open the window. In a plane your breath may manipulate the controls. In the same way you may operate heavy machinery. In fact, there is almost no limit to the possibilities which a little "blowing" may accomplish. Only this is a purposeful sort of blowing, not mere whistling stuff.

Believe It Or Not

Mountain peaks in the Cariboo range are growing taller, according to fur traders at Fairbanks, Alaska. As proof, one trapper points out that he has found trees on mountain sides with high water marks on them from lakes and streams now hundreds of feet below. A government geological party has been asked to investigate the growth of the peaks.

Says Saskatchewan May Save
Over \$300,000 In Connection With
Freight Rates On Canned Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. Merkley, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr. Merkley adds. The rates in effect would continue until the close of navigation on the great lakes and then the master will have to be fought out all over again," he added.

The government had received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been won on July 14 and September 15, Mr. Merkley said in conclusion.

"The stalls," we are reminded, "do not applaud so heartily and unrestrainedly as the pit and gallery." No; they are the reserved seats.

In all Belgium there are only about 12,600 unemployed.

An Emergency Dressing

Minard's is invaluable as a quick dressing for burns, scalds, and all flesh abrasions. It cleanses and soothes the wound.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh griping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S FRUIT SALT after each meal, a glass of water morning or night, tones up and strengthens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

CHAPTER I.—Continued

Bore her—Nick, who had never said a dull thing in his life! And he really meant it. She could tell by the look in his eyes. He wasn't joking. It made her smile, even as she answered shakily, because she couldn't quite control her voice: "I always knew, Nick, that you possessed a streak of chivalry; but to have it carry you to this extent—"

"Chivalry be darned!" he interrupted. "That's myrronit, my dear, and you know it. Come on, Gay. Be a sport. Put on your 'old grey bonnet' or whatever headgear you prefer—tie a few necessaries in a handkerchief, and—" He closed his eyes, folded his arms, and softly sang: "Oh, that we two were Maying."

Nick's voice, sweet and true as a bird's, always stirred the girl. She turned now and laid her hand on his. "You're a good friend, Nick—I the less you'll mind if I tell you that I never thought what you said for me just now. Somehow, it makes everything easier; but I refuse to spoil your freedom, dear old boy."

Nick squeezed her hand.

"A half hour ago," he proclaimed loftily, "I stood in the orchard he quaffed me by my late uncle, and announced to all who cared to hear, that I could conquer the world. And now you imply that I can't conquer a slip of a girl in a pink gown. I refuse to be vanquished! Something tells me that you'd be able to put up with me. Without conceit, I think I can promise to prove a more thrilling housemate than Miss Sadie. Run along now, and pack your bag. I'll allow you a suitcase as far as State Line. In forty minutes—no, thirty, I'll be at the back gate in uncle's rusty flyover. We'll leave it behind us after the person has done his worst. Be gone, girl. The hour wakes 'em."

"Are you really—proposing to me?"

Gay's cheeks burned, and the young man answered: "I am. Gee! I've always supposed it would be a fearful undertaking, and it comes as easy! For two cents I'd kiss you, if I wasn't afraid Seline was at the window."

To his surprise Gay stifled a sob.

"I can't, Nick."

"Why not?"

"It wouldn't be fair."

"Not to you, perhaps," he agreed.

READ OF A CASE
LIKE HER OWN

Decided to take Lydia E.
Pinkham's Vegetable
Compound

Moncton, New Brunswick.—"Indeed, my last baby was I very weak, nervous and disengaged. I saw an advertisement in the paper about Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through the time I had to care for and I feel well and strong. I have told two other women about your medicine."—Miss, Gus LEBEAU, St. Albert Street, Moncton, New Brunswick.

W. N. U. 1858

amably. "For me, it would be a cinch."

"You're—so young," she hesitated. "I'm older than you!"

"Not really," she contradicted. "Not in your feelings, Nick. You're just a kid."

"Before night," he announced proudly, "I'll be a married man; but not if you duly follow this way. My dear, it's the very top of the morning. Let's be off."

He arose, pulling her to her feet, and at his touch something of his own buoyancy and enthusiasm swept through her. Her eyes alighted. She said, her heart palpitating wildly: "Oh, I'll love it, Nick!"

"'Till the nines!" he quoted, and turned away, calling over his shoulder: "In thirty minutes—at the back gate, I'll be off. And stopping to rescue the emblems of freedom that he had dropped for her sake, vaulted the low wall and disappeared.

CHAPTER II.

Thirty minutes!

Gay stood paralyzed in her own little room, to which she had fled when Nick strode away. "In thirty minutes," he had said, "at the back gate." How could one get ready to change one's entire life in a half hour? The idea was preposterous. There was so much to do: a note of explanation to Miss Sadie; a lunch to save the poor chamber, at a hotel; a small enough suitcase! a suitcase, . . . What, oh what, should she put into her suitcase?

Still dazed, she opened her closest door, where, as if in answer to question, hung a big bandanna that had adorned her shoulders when she acted as Giggy, fortune teller at a church fair. The sight brought an inspiration. Both the suitcase! She would be as good a tramp as Nick himself!

Gay laughed joyously. She didn't know that this inspired decision was something Nick was never to forget; but she felt dazed no longer as she snatched the handkerchief and spread it on her bed. In five minutes she was out of the pink gown and slipping into a khaki middy. In fifteen she was tying a knot in a bulging bandanna bundle. In twenty she was scrawling a hasty note which was doomed to scandalize Miss Sadie Twichell; and in thirty, when Nick was to schedule, arrived at the back gate, she stood waiting, breathless, to be sure, but waiting, her bundle tied to the late Grandpa Twichell's cane swaying over on shoulder, a crimson sweater over her arm, a crimson tam upon her head, and a lunch basket at her feet.

"On time," said Nick.

His eyes, sweeping upward from the stout Oxford on her small feet to the stick and bundle, widened with surprise. Gay never forgot that look. In those thirty minutes Nick had regretted his rash decision; his fears were put to flight. The smile he threw her caused Gay's heart to sing. Nick was pleased!

"Good girl," he said with vast approval, and was at her side. He lifted the basket questioningly.

"Lunch," Gay answered. "It'll save buying one."

Nick laughed. "I see I have chosen a thrifty wife," he said and proceeded without further comment to stow away her bundle in the back of that machine.

There followed a quarter of an hour that to Gay seemed deathlessly constrained. It wasn't the silence—she was used to silences with Nick; it was something that asked: "Oh, have I done right? this far to him?"

As for Nick, he appeared to be unnecessarily intent upon the familiar road. It was not until the town was left behind; and they had chugged to the top of Sunset Hill that he stopped the car, breaking the silence to say quietly: "Take your last look at our native health, Gay!"

She arose and turned about, laying a steady hand upon his shoulder. Something clutched at her heart, as

she looked down on the town that had sheltered her all her life. It had sometimes seemed a prosaic town to Gay; now, in comparison with a bewildering and unexpected future, it looked dear and friendly. Almost, she was sad to leave it. The grass of the common was so gaily green, topped by tender, uncurling leaves of elm trees that had stood there for a century. Blossoming orchards sloped to the quiet river; and everywhere was the sweet scent of spring.

Nick's hand tightened, and Nick covered it with his own.

"Homesick—already?" he questioned.

Gay shook her head as they began the descent of the long hill.

"No, Nick. I wasn't homesick; exactly; but it looked so natural; and what we're doing is so amazing. Why, even an hour ago I didn't dream—"

She stopped, as if it were difficult to express her thoughts; and Nick continued: "That before the sun was high you'd be starting on your honeymoon? Well, Gay, we're both in the same boat. I don't wonder you feel a little dazed. I'm dazed myself; but you're not to feel homesick. I shan't let you. I tell you what, young lady, we're lucky to live within forty miles of a state where we can get a license and be married all in an hour!"

"And how I've scorned the people who have done it!"

Gay dashed hotly at the memory; but Nick only smiled as he admitted: "Same old, girl. We never know when the shoe may pinch the other foot, do we? But there's one thing I'll wager a bride never did before, Gay, and that's to start off on her honeymoon with her goods and chattels tied up in a bandanna."

He spoke so seriously that for a moment Gay forgot the look he had given her when they started. She wondered, with a little chill at her heart; if Nick would rather she'd have come to him as well; as most girls would have come. Was there, perhaps, something in him that revolted at what might seem a lack of daintiness on her part. He didn't know what that red bandanna held!

"Nick," she began, as if she was just the least bit frightened, "did you think it was nice of me to come this way?"

He turned to her, surprise written on his face. "Nice?—why?" (he put his foot on the brake bringing the car almost to a standstill.)

"Why? I thought it was nice of me to come this way?"

He turned to her, surprise written on his face. "Nice?—why?" (he put his foot on the brake bringing the car almost to a standstill.)

J. C. McFarland & Co.

Main Street

Rexall One Cent Sale coming to Irma. Watch for further particulars.

Mrs. Schonert returned Sunday after having been away for two weeks.

R. J. Kirkwood of St. Paul is assisting agent at the station.

Mrs. Bouch of Heath has been visiting her mother Mrs. Frank Peterson.

Dr. and Mrs. Murray of Lougheed and her father Mr. Wood spent Sunday in Irma with Mr. and Mrs. Watson.

Mr. and Mrs. C. Dawes of Edmonton were weekend visitors at the Askin farm.

Sidney Inkin returned home Sunday from Edmonton where he was operated on for appendicitis.

The W. M. S. will meet at the home of Mrs. James Fenton, October 16th. All visitors welcome.

Word has been received that Mrs. McGregor and daughter Nina arrived safely in California and had a very pleasant trip.

The Mission Band kiddies have been all over town with invitations to their play and concert Friday night and are looking for a good turnout.

Miss Price has again added to her territory of music, besides going to Jarrow once a week, she goes to Wainwright on Monday's coming back Tuesdays.

Mr. and Mrs. Jack Bishop had a terrible scare when little daughter Sheila took violent convulsions on Tuesday afternoon. The Doctor found the trouble was caused by the teeth, and the little girl is doing nicely now.

Mr. R. H. Dunlop was a visitor at the Fenton home over the weekend. Mr. Dunlop has just about completed making something like seventeen thousand calls in the interest of the Dominion Forestry Farm, covering the northern half of Alberta, after which he and his family will return to Indian Head, Sask., to take up work at the farm there for the next six months.

We read of so many accidents in the big cities where children are struck by cars, but if parents of Irma and district don't take notice we will have accidents right here in our own town. The habit of playing tag or hide and seek out, among the parked cars on Saturday nights is very dangerous, and if Gordon Fenton had not had A1 brakes, two little fellows might have been badly hurt last Saturday night. Parents please take notice.

Here and There

(C-12)

The first electrically-driven tug to be built in Canada was launched at Lauzon, Quebec, recently, when the Canadian Electric Tug Co. of the Canadian Pacific Railway's service between Preacott and Ogdensburg, slipped into the waters of the St. Lawrence after the traditional bottle of champagne had been broken. The tug was built by Mrs. M. McD. Duff, wife of the manager of the Canadian Pacific Great Lakes Steamship service. It is the first electric tug to be built in Canada, and is designed to tow a three-track railway car-float with accommodation for 16 hundred-ton ton.

Canada is taking advantage of all opportunities for foreign exchange, and I think we are far ahead of England in the matter of sending students to sanatoria to make an intensive study of the subject, said Dr. J. A. Coutts, a member of the group of British and Canadian experts interviewed aboard S. S. Montcalm, on his return to England after some weeks' stay in the Dominion.

Stating that the Canadian Chamber of Commerce official tour of Japan and China leaving Vancouver and Victoria October 16 aboard S.S. Empress of Russia, offers a splendid chance for the Canadian's position as a trading nation, Col. J. H. Woods, Calgary publisher and president of the Canadian Chamber of Commerce, speaking to 300 members of the Vancouver Board of Trade in a address at the Hotel Vancouver recently, urged Canadians to take full opportunity of the chance afforded by the tour.

Canada's wild life has a capital valuation of one billion dollars and represents a yearly business turnover to the Dominion of about \$45,000,000. D. H. F. Lewis, of the Department of Agriculture, told the delegates to the Provincial-Dominion game conference at Ottawa the other day. The valuation includes the fur harvest, game fish and their after-products, the manufacturers of firearms and fishing tackle, not to mention railways, tourist camps, magazine publishers and others who derive a certain revenue from this source.
